

## The Space Scholarship

The SES Space Scholarship was launched in 2018.

It is a unique opportunity for students who are between 17 and 18 years old, are interested in the space industry and have completed their GCSEs to gain valuable experience and insight.

The scholarship is designed to introduce and inspire the individual towards the wide range of career opportunities in the space industry.

We recognise the positive value of diversity, promoting equality and challenge discrimination. We welcome and encourage scholarship applications from people of all backgrounds.

For the Space Scholarship, we particularly welcome applications from female applicants as this group is currently under-represented throughout the aviation and aerospace industry.

### About SES

SES is the world-leading satellite operator with a fleet of almost 70 satellites, of which more than 50 in Geostationary Earth Orbit (GEO) and 16 in Medium Earth Orbit (MEO). SES' two key business units, SES Video and SES Networks, deliver powerful end-to-end and customer focused solutions reaching 1 billion people every day, connecting and enabling over 700 broadcasters, telecom, corporations and governments. SES flexible network enables differentiated applications in domains such as aeronautical, maritime and cellular networks as well as government and institutional operations, powering the development of connectivity across the world. SES's portfolio includes MX1, a leading media service provider that offers a full suite of innovative digital video and media services and GovSat, a 50/50 public-private partnership between SES and the Luxembourg government. SES is listed on the Euronext Paris and Luxembourg Stock Exchange (SESG). Further information available at: [www.ses.com](http://www.ses.com)

### About The Air League

The Air League is a charity dedicated to aviation and aerospace, and the place they hold in Britain's future. For over a hundred years, we have been showcasing these areas, highlighting their role in security and technological innovation, and their important contribution to the economy and to British society. Britain remains at the forefront of aviation and aerospace, both as a major player in global security, and through its significant work in the fields of technology and innovation. These are areas that the Air League exists to champion, thanks to the vital help of our members and supporters. We also encourage our young members, attracting the bright minds and talent of tomorrow via the ongoing provision of many Scholarships and Bursaries. And with corporate backing, we are working regularly with disadvantaged groups, using aviation and aerospace as a gateway to life-changing experiences and opportunities.

### How to apply

2019 Space Scholarships will launch in the Spring of 2019. Further details to follow.
